

Quiz no. 1

Convert each verbal expression into a mathematical expression with numbers and symbols

Match each letter with the correct answer.

A	The next number of a Natural number	$v+1$
B	The previous number of a Natural number	$2x$
C	Twice a number	$x:2$
D	The half of a number	$x+5=8$
E	If we add 5 to a number gives eight	$v-1$

Quiz no. 2

Examine if the number is the solution of the given equation.

1

Is number 2 the solution of the equation $2x-4=6$?

True or false?

2

Is number 5 the solution of the equation $3x-4=11$?

True or false?

3

Is number 1 the solution of the equation $4,5x+2,5=7$?

True or false?

Quiz no. 3

Problem based on 1st degree equations

There are 38 boys. This is 6 more than double the number of girls. How many girls are there?
